# Weekly Coal Production

Production for Week Ended:  
June 3, 1989

## Preface

The *Weekly Coal Production (WCP)* provides weekly production estimates of U.S. coal by State, as well as supplementary data which are usually published twice a month. This week's Supplement contains the latest data available for coal consumption, stocks, and receipts at electric utility plants, and for U.S. coal and coke exports and imports. This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data collection and dissemination responsibilities as specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended.

*Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report*, the *Quarterly Coal Report*, *Coal Production 1987*, and *Coal Data: A Reference*.

This publication was prepared by Wayne M. Watson under the direction of Mary K. Paull and Noel C. Balthasar, Chief, Data Systems Branch. *Questions on energy statistics should be directed to the National Energy Information Center (NEIC) at (202)586-8800.*

• Released for Printing June 9, 1989

## Summary

U.S. coal production in the week ended June 3, 1989, as estimated by the Energy Information Administration, totaled 18 million short tons, a 4 percent drop from the previous week. The lower level of production reflects the Memorial Day holiday. However, production in the week ended June 3, 1989 was 2 million short tons higher than in the comparable week of 1988, which also included the holiday.

Coal consumption at electric utility plants in the first quarter of 1989 totaled 191 million short tons, 3 million short tons higher than the level a year earlier. This was a record for the first quarter and ranked as the third highest level for any quarter. Increased demand for coal-fired electricity in Ohio, Texas and West Virginia was responsible for most of the gain.

At the end of March 1989, coal stocks at electric utility plants totaled 139 million short tons as compared with 163 million short tons a year earlier. Since the end of December 1988, coal stocks at electric utilities have

been about 22 to 25 million short tons below their corresponding levels a year earlier.

U.S. coal exports in the first quarter of 1989 totaled 21 million short tons. This was one-third greater than in the same period a year earlier and ranked as the highest first-quarter level since 1982. Metallurgical coal accounted for most of this increase (4 million short tons). Steam coal exports were up from the first quarter of 1988 by over 1 million short tons. Shipments of steam coal to Canada totaled 0.7 million short tons, the largest amount for any first quarter in this decade. According to the Lake Carriers' Association, this was due to a short-term demand for additional coal by a Canadian utility company.

U.S. coal imports in the first quarter of 1989 totaled 0.5 million short tons, approximately the same as in the comparable quarter of 1988. Colombia and Canada continued as the principal sources of imported coal, accounting for 49 percent and 36 percent of the total, respectively.

# Energy Information Administration Electronic Publication System(EPUB)

## User Instructions

Selected energy data reports can be obtained electronically from the Energy Information Administration (EIA) Computer Facility. Public access to these machine readable statistics is possible by dialing (202) 586-8658 for 300 baud or 1200 baud line speeds. Communications are asynchronous and require a standard ASCII-type terminal. There is no charge for the service. Although there is no required password, you will be requested to use your telephone number as a user identifier. This service is available from 8 a.m. to 11 p.m. weekdays and 10 a.m. to 6 p.m. on weekends and most holidays. The Weekly Coal Production report is normally updated by 2 p.m. on Friday of each week. Allow one or two additional workdays in weeks containing holidays.

### Access Instructions:

1. DIAL (202) 586-8658
2. HIT RETURN (CARRIAGE RETURN) TWO OR THREE TIMES UNTIL THE EPUB BANNER APPEARS

WELCOME TO THE  
ENERGY INFORMATION ADMINISTRATION  
ELECTRONIC PUBLICATION SYSTEM

3. SELECT THE STATISTICS YOU WISH FROM THE MENU

THE FOLLOWING REPORTS ARE AVAILABLE:  
WPSR - WEEKLY PETROLEUM STATUS REPORT  
PSMR - PETROLEUM SUPPLY MONTHLY  
STKS - PSM STATE STOCKS TABLE  
WCPR - WEEKLY COAL PRODUCTION REPORT  
PLEASE ENTER THE DESIRED REPORT ID...WCPR

4. ENTER YOUR 10 DIGIT PHONE NUMBER

\$WP1081 LOGON IN PROGRESS AT 14:23:22 ON JUNE 6, 1986  
PLEASE ENTER YOUR PHONE NUMBER...

5. YOU WILL THEN SEE A BANNER WHICH SHOWS THE REPORT YOU HAVE SELECTED AND PAUSES TO ALLOW AMPLE TIME TO GET READY TO RECEIVE OUTPUT OR TURN PRINTER ON

YOU HAVE SELECTED WEEKLY COAL PRODUCTION REPORTS  
(PRINTING WILL BEGIN IN 20 SECONDS)

Note: Users who experience problems when first attempting to logon should check their terminal switch settings for the following:

- 7 Data Bits
- 1 Stop Bit
- Even Parity

# EIA Coal Publications

## **Data Reports**

*Coal Production* reports annual coal production, average mine price, average daily production, mine stocks, recoverable reserves, average recovery percentage, average productivity per miner per hour, average number of miners working daily, number of days worked, and the Nation's demonstrated reserve base (DRB). (Issued annually.)

*Coal Data: A Reference* is a comprehensive overview of the U.S. coal industry which is designed to be of value to both laypersons and technicians. It contains a historic review of the U.S. coal industry and up-to-date information on U.S. coal deposits, reserves, mining methods, production, employment, health and safety, preparation, transportation, stocks, uses, exports, environmental issues, and the outlook for the future. Also presented are an extensive bibliography of books, publications, and articles on coal and a listing of Federal, State, and private sources of coal information. (Issued biennially.)

*Coal Distribution* reports shipments of coal by State of destination, consuming sector, mode of transportation, and coal-producing district of origin. It also presents production and producer/distributor stocks. (Issued quarterly.)

*Quarterly Coal Report* highlights coal-related legislation and industry trends; and quarterly coal production, coal exports and imports, domestic coal consumption, receipts, and stocks. (Issued quarterly.)

*Weekly Coal Production* provides weekly production estimates of U.S. coal by state, as well as supplementary data which are published twice a month. Supplement 1 includes monthly statistics on U.S. coal production and aggregated annual historical data on coal supply and demand, consumption, stocks, imports, and exports. Supplement 2 contains monthly data covering electric utility coal consumption, stocks, and receipts; and coal imports and exports. (Issued weekly.)

## **Analytical Reports**

*Annual Outlook for U.S. Coal* expands on the coal forecasts of the *Annual Energy Outlook*, EIA's volume on multi-fuel price, supply and demand projections to the year 2000. By focusing on a single fuel, the *Annual Outlook for U.S. Coal* clarifies how the projections were made, discusses major coal industry issues, and provides additional detailed projections. (Issued annually.)

*Annual Prospects for World Coal Trade* projects U.S. coal exports and imports, analyzes world coal trade flows, and highlights both current and potential major coal exporting countries. (Issued annually.)

*The Changing Structure of the U.S. Coal Industry 1976-1986* analyzes the changes which have occurred in the U.S. coal industry between 1976 and 1986. Utilizing concentration ratios and other data, the report confirms the shift in coal production from smaller to larger firms, while showing that the production shares of the largest firms have decreased. (June 1988, 34 pages.)
